

SCALE PREVENTION SYSTEM

WHAT ARE THE PROBLEMS WITH HARD WATER?

Heavy white and green scale deposits form on various places in the home and, over time, can result in stains and flow reduction. Scale is also known to cause bacteria growth. The filtering process stops this as well as attacks organics and chemicals. The Scale Prevention System keeps your family and house healthier.

The Pro Water Scale Prevention System changes calcium ions into calcium nano-crystals. This is called Nano Technology. The altered crystals move through pipes and do not attach themselves to surfaces like copper pipes, water heaters, porcelain, faucets, appliances, and other items in your home that come in contact with water

SCALE PREVENTION BENEFITS:

- No More Salt or Potassium
- Health / No More Chlorine or Chemicals
- Scale Reduction In Your Home
- 10 Year Warranty
- No Maintenance
- Appliances Last Longer
- NSF61 Gold Seal of Approval
- Improves ALL Water Heater Performance

Warranty on Clack In and Out Valves – 5 years
Warranty on Tanks – 10 years

THE SOLUTION TO “WHOLE HOUSE” HARD WATER TREATMENT WITHOUT THE EXPENSE OF SALT OR POTASSIUM

DIGITAL CONTROL VALVE

Simple to operate and controls a reliable cycle

SUPERIOR TANK CONSTRUCTION

Tank is fabricated with solid polyethylene casing surrounded by an almond vinyl outer sleeve

HIGH GRADE COCONUT SHELL CARBON

Eliminates chlorine, chloramines, lead, mercury, arsenic, ammonia, and other contaminants

KDF 55

Extends the life of carbon 50%, resulting in longer life than other systems available

QUARTZ FILTER

Removes sediment found in sinks, tubs, and faucet screens
